

JASMINE CAVAZOS

Results-Driven | C Developer | Business Systems Optimizer |
Debugging & Monitoring

+1 2149700294

jasminecavazos0415@gmail.com

Remond, Washington, US

CERTIFICATIONS

- freeCodeCamp: Legacy JavaScript Algorithms and Data Structures (April 2025)
- codecademy: Securing Code Practices in C (January 2025)
- Microsoft | Analyzing and Visualizing Data with Power BI and Power Platform Fundamentals (April 2025)

EDUCATION

- B.S. Information Technology – Information Systems Management (*In Progress*) | Western Governors University
- Business Administration Coursework | South Plains College – Levelland, TX

SKILLS & TOOLS

- Languages: C, JavaScript, HTML, CSS, XML, PowerShell
- Cloud Platforms: Microsoft 365, SharePoint, Power Platform, Azure Fundamentals
- Monitoring/Debugging: Dynatrace, ServiceNow, ConnectWise
- Automation Tools: Power Automate, Excel
- System Admin: Active Directory, MFA, Windows Server, Imaging, Asset Management
- Project Tools: Jira, ManageEngine, Zendesk, Tableau, Qlik

PROGRAMMING PROJECTS

Python Automation Script Device Onboarding (2024)

- Created a Python script to automate device inventory reporting via CSV uploads to SharePoint, reducing manual update times by 40%.

PinPoint E-Commerce using HTML & CSS

- Created an E-Commerce customer checkout page, utilizing Color Theory elements within CSS to help customers make the right decisions based on UI design.

Python Syntax: Medical Insurance Project

- Explored how personal factors like age, and BMI influence annual medical insurance costs using a cost estimation formula, simulating analysis from a healthcare professional's perspective.

SUMMARY OF EXPERTISE

Versatile and business-driven IT Engineer with 8+ years of front-end development experience (HTML, CSS, JavaScript) and 3+ years in service desk, software support, and systems administration. Skilled in process automation, large-scale debugging, and cross-functional collaboration within enterprise environments. Proficient in scripting with C for user administration, XML for monitoring/debugging via Dynatrace, and building user-facing solutions with modern web technologies. Strong analytical background with expertise in Microsoft 365, Power Platform, and business process optimization. Currently pursuing a B.S. in Information Technology, with certifications in Power BI, JavaScript Algorithms, and Power Platform. Eager to contribute to high-impact, scalable engineering initiatives.

PROFESSIONAL EXPERIENCE

Front-End Website Developer (Freelance Contract)

House of Ink Screen Printing & Vinyls

October 2016- Present

- Designed, developed, and maintained a responsive, user-friendly website using HTML, CSS, and JavaScript, enhancing customer engagement and aligning UI/UX with business needs.

Business Market Specialist – SaaS Solutions, West Region

MSX International (Ford Motor Company)

January 2025 - March 2025

- Built a YAML-based CoPilot Studio agent for ticket triage, integrating with Microsoft Teams to automate routing logic, service recommendations, and data collection.
- Prototyped API-driven survey tools using Azure and JavaScript to collect post-support engagement metrics from Ford dealership partners, enhancing feedback loops by 30%.

Software Support Technician

MSX International (Ford Motor Company)

November 2023- January 2025

- Debugged production incidents using Dynatrace and XML-based telemetry, collaborating with QA and engineering teams to resolve critical issues in Ford's SaaS systems.
- Designed and implemented automated user feedback workflows using Azure Communication Services and Power Automate, integrating Forms and Teams UI controls via JavaScript.
- Developed scalable SOP systems for new hires, reducing onboarding time by 50%, and documented recurring system faults for API refinement efforts.

Information Technology Department Coordinator

Remington Hotels

January 2023 - November 2023

- Deployed C-based scripts for automated user provisioning and lifecycle management in Active Directory, cutting manual processing by 60%.
- Used Microsoft Intune and Azure AD to enforce security policies, monitor endpoints, and evaluate access management performance across 300+ devices.

Business and Data Operations Analyst (Contract)

Mental Pain and Trauma Center, LLC

December 2021- August 2022

- Used Excel's VLOOKUP, INDEX/MATCH, and conditional logic to extract, transform, and report on client operations data for efficient data analysis and data extraction, identifying gaps in trend analysis.
- Collaborated with leadership to implement data-driven communication templates that enhanced client engagement and process reliability, utilized PowerBI for data-visualization.

Director of Operations and Business Systems

House of Ink Screen Printing and Vinyls

August 2014 - May 2017

- Created SOP documentation within Astute Knowledge Environment using integrated XML/CSS scripting logic
- Centralized invoice/order processing and improved reporting with QuickBooks automation
